FOR IMMEDIATE RELEASE

Four Hundred IVF Babies Party Like Animals at Pittsburgh Zoo

Reproductive Health Specialists' Patients Celebrate Their Triumph Over Infertility with a Wild Party!

PITTSBURGH – May 1, 2006 – More than 400 IVF babies and their families will join local fertility center Reproductive Health Specialists' (RHS) for a wild time at the practice's annual Birthday Party at the Pittsburgh Zoo! This popular and growing event, in its third year, celebrates RHS patients' triumph over infertility and the expansion of many happy and healthy families. The party will be held Sunday, May 7, from 2:00 p.m. to 4:00 p.m. at the Garden Tent at the Pittsburgh Zoo.

As part of one big, happy family, these cheerful babies and elated parents have even more to celebrate than most. At one time, these parents all suffered from infertility – a heartbreaking and challenging struggle – but now all they want to do is party! The Birthday Party at the Zoo is a time for RHS patients and their 400 children to come together – in joyful disarray – with Dr. Judith Albert, Dr. Carolyn Kubik and the rest of the RHS staff to celebrate the birth of these miracle babies.

This celebration also marks a milestone for RHS, which has increased its total success rates with the birth of more than 400 IVF babies since the practice's inception in 2000.

With recent advances in reproductive medicine, especially in vitro fertilization (IVF), RHS has proudly helped even more couples to overcome infertility and fulfill their dreams of having children. As specialists and pioneers in reproductive health, the doctors at RHS have established a practice that provides advanced and effective fertility treatments and highly personalized care.

This rambunctious group of children and families will celebrate with birthday cupcakes, gifts for the kids and activity centers run by RHS staff members, such as animal-cookie decorating and sidewalk chalk doodling.

Reproductive Health Specialists, Inc. (RHS) is the region's only independent, women-owned and operated reproductive endocrinology and fertility center focused on one goal: helping every patient to have a baby. The practice has two locations: Monroeville and Wexford.
