***Back to Basics: How Chiropractic Care Can Benefit Reproductive Health***  
*RHS Hosts Lecture with Area Chiropractor*

PITTSBURGH – March 3, 2008 – Reproductive Health Specialists (RHS) is encouraging patients to think about the benefits of chiropractic care in relation to their fertility. On Monday, March 17, 2008 at 7:00pm, RHS will host a talk, “Benefits of Chiropractic Care for Infertility Patients” at their Wexford office location.

The talk is part of RHS’s Balance Within program, which encourages patients to take a holistic approach to fertility treatment. Research has shown that chiropractic care can help increase fertility in some patients by helping the nervous system function properly.

Dr. Brianne Kemp of Choice Chiropractic & Wellness Center will be presenting the lecture. For more information or to register for the talk, please call (412) 731-8000.

*Reproductive Health Specialists, Inc. (RHS) is the region’s only independent, women-owned and operated reproductive endocrinology and fertility center focused on one goal: helping every patient to have a baby. The practice has two locations: Monroeville and Wexford.*
